

Ravi Mandal

Computer Science & Engineering

Panipat Institute of Engineering and Technology

Ph No: 9704374211

Email ID:mandalravi952@gmail.com

DOB: 27 sept 2001

Education	University	Institute	Year	CPI/%
Graduation	Kurukshetra	PIET	2020-24	8.64
Graduation Specialization: Computer Science				

WORK EXPERIENCE & INTERNSHIPS

- **Full Stack Developer| Apna Collage** (Aug'23 – Dec'23)
Technologies: javaScript,Nodejs,Expressjs,Mongodb,Redux
 - Developed a fully responsive Airbnb-like property rental web application using **MongoDB, Express.js, React.js, and Node.js (MERN)**.
 - Implemented key features such as user authentication, property listing, booking system, user profiles, reviews, and real-time availability status.
 - Integrated **Cloudinary** for image upload, **JWT** for secure login, and **PayPal** (optional) for payment gateway integration.
 - Designed a dynamic UI with React and **Tailwind CSS**, ensuring mobile-first responsiveness and optimized user experience.
 - Built RESTful APIs with Express.js and Node.js, implementing CRUD operations for listings, bookings, and users.
 - Deployed frontend on **Vercel** and backend on **Render/Heroku**, ensuring continuous deployment and CI/CD integration.
- **Traineeship |Broadway Infosys** (May'21 - Jul'21)
Technologies: JavaScript,Nodejs,Expressjs,Mongodb,Typescript
 - Developed a dynamic eCommerce website integrated with a headless **CMS** to manage products, categories, banners, and content without modifying the codebase.
 - Built scalable product listing and filtering features with dynamic routing and pagination using React.
 - Implemented user authentication and role-based access control using **JWT** and protected routes.
 - Integrated payment gateways (e.g **Khalti**) for secure transactions and handled order and cart management.
 - Utilized **Cloudinary** for image uploads and optimized content delivery.
 - Created an admin panel to manage inventory, user roles, orders, and analytics.
 - Focused on SEO-friendly, responsive UI with accessibility and cross-browser compatibility.
- **Internship: Codsoft**
- **Technologies:Html,Css,Javascript** (Summer Internship) (Aug'22 – Sep'22)
 - Designed and built a high-converting landing page for a fictional product/service, optimized for both desktop and mobile.
 - Build Netflix clone with help of html, css and javascript.
 - Used semantic HTML and clean CSS to ensure accessibility and SEO optimization.
 - Built a visually accurate clone of the Netflix homepage using pure HTML, CSS, and vanilla JavaScript.
 - Implemented interactive features like hover animations, image sliders, and mobile-responsive layout.
 - Included sections like hero banner, features, testimonials, and contact form with validation.
- **Internship:AICTE Idea Lab(PIET)** (Summer Internship) (Jul'21 –Sep'21)
Tech Stack: Python, TensorFlow/Keras, OpenCV, NumPy, Matplotlib
 - Developed an image recognition system capable of identifying and classifying objects from images using deep learning models.
 - Utilized convolutional neural networks (CNNs) built with TensorFlow/Keras for high-accuracy image classification.
 - Evaluated model performance using metrics like accuracy, loss, confusion matrix, and precision-recall

B.TECH PROJECT

- **iSchool-eLearnig**
- **Tech Stack: HTML, CSS, JavaScript, PHP, MySQL, Apache, Git, XAMPP/WAMP**
(BTech Project,Advisor: **Assoc. Prof. Rajendra Saini PIET**) (Feb'23 - May'23)
 - Designed and developed a responsive eLearning web platform for students and instructors, inspired by systems like iSchool or Moodle.
 - Implemented key features such as user registration/login, course listings, lecture video uploads, and downloadable materials.
 - Created role-based dashboards for **students** (course enrollments, quizzes, progress tracking) and **teachers/admins** (course creation, student management).
 - Built a backend REST API using Express and stored user/course data in MySQL.
- **Mega Bazzar**
- **Tech Stack: MongoDB, Express.js, React.js, Node.js, Redux, JWT, Cloudinary**
(BTech Project Advisor:**Ass.Professor.Stuti Mehla PIET**) (Sep'23-Dec'23)
 - Built a full-stack furniture eCommerce platform enabling users to browse, filter, and purchase a wide range of furniture products.
 - Developed user authentication with **JWT**, including role-based access for Admin and Customers.
 - Designed dynamic and responsive UI with React and **Redux** for state management.
 - Created RESTful APIs using Node.js and Express.js for product, order, and user management.
- **Chat Application**
- **Tech Stack: MongoDB, Express.js, React.js, Node.js, Socket.io, JWT**
(BTech Project Advisor:**Ass.Professor.Upasana Lakhina PIET**) (Feb'24-May'24)
 - Developed a real-time chat application enabling users to send instant messages in private and group chats.
 - Implemented user authentication and authorization with **JWT** to secure chat sessions.
 - Used **Socket.io** for real-time, bidirectional communication between clients and server.
 - Created RESTful APIs with Node.js and Express.js to manage users, chat rooms, and message history stored in MongoDB.

TECHNICAL SKILLS

- **Programming & Scripting Languages:** C, C++, Python, SQL, Java
- **Development:** HTML, CSS, JavaScript,React,ExpressJs,NodeJs,TypeScript,NextJs
- **Tools & Libraries:** Pandas, Numpy, Matplotlib, Pytorch, Tensorflow, Django, Postman, Git, Docker, Kubernetes
- **Databases:** Microsoft SQL Server, PostgreSQL, OracleDB, MySql

INTERESTS AND HOBBIES

- Swimming, Exploring, Travelling, Cooking
